## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 13-18, 21-32 and 34-44 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-7 and 10-23 of copending Application No. 10/596,139. Although the conflicting claims are not identical, they are not patentably distinct from each other because the phosphorus compounds missing from the claims of the copending application can be found in paragraphs 0034 and 0069 of US 2007/0257239, which is the published copy of said copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 103***

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 13-18, 21-32 and 34-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP-2003-192925, with Yamada et al. 2005/01435502 acting as its English translation, in view of Yoshida et al. 20002/0151631.
5. The rejection is maintained in view of the "Response to Arguments" set forth below.

***Response to Arguments***

6. Applicant's arguments filed 3/4/09 have been fully considered but they are not persuasive. Although Yoshida et al. do not specifically recommend using the nitrogen containing in biodegradable compositions, they do not recommend against it either. Furthermore, the reference recommends blending the nitrogen containing compounds with metal hydroxides in order to achieve better flame-retardance, and the composition of Yamada et al. contains the same metal hydroxides making the use of the blend of Yoshida et al. patently obvious. The fact that halide containing flame-retardants might be ineffective in biodegradable compositions does not mean that the same applies to nitrogen containing flame-retardants. As a matter of fact Yamada et al. teach the use of metal nitrates and cyanurate compounds and applicants did not prove that the decomposition products of these compounds do not contain oxides of nitrogen. Additionally, applicants' Table 6 does not contain unexpected results. One of ordinary skill in the art would expect improved flame retardance as result of the addition of an

additional flame-retardant. There are no unexpected results shown for the use of 100 parts of hydroxide either. The rejections stand.

7. All other rejections are withdrawn by the examiner in view of applicants' response.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
